

REVOLUTIONARY PRODUCT RECEIVES UL AND cUL APPROVALS

YORK HAVEN, Pa. July, 23 2013 - - [Daisy Data Displays, Inc.](#) (D3), industry leader in engineering and manufacturing durable computing solutions for hazardous working environments, has recently received UL and cUL approvals for Class I&II, Division 2 area on their [Rigmate 4023](#) all-weather unit.

Compared to most products produced at D3, the Rigmate 4023 is much lighter, weighing in at only 23 pounds. The unit's NEMA 4X rugged aluminum enclosure has special UV tolerant paint finish and was engineered and designed to withstand high shock and vibration to survive in hazardous conditions, such as rig floors or truck mounted applications. The 15" touchscreen display features sunlight readability, promoting brilliant visibility in virtually all lighting conditions.

"Here at Daisy, we strongly believe in constant innovation to meet the needs of our customers," says Michael Hadaway, General Manager of D3. "With the **Rigmate 4023**, we integrated new technology to give us the flexibility to use faster processors for this new-age compact solution. We have already received positive feedback from our Oil Exploration customers. "

Daisy Data Displays, Inc. is an international developer and manufacturer of specialized and rugged computers, displays and keyboards designed to sustain extreme industrial and plant environments. The company is based out of York Haven, Pa.
